

Dimethyl Ether (DME)

Paintspray

DME is an ideal propellant for paintsprays due to its non toxic, high solvency and water miscibility and zero GWP potential.

Benefits:

	Economic	Functional
Reduced solvent use & concentrated formulations due to high solvency power	✓	
Specific solvency for resins and pigments → More powerful solvent for commonly used resins than Propane / Butane	✓	✓
Green labelled spray paints due to green DME → Subsidy benefits from eco friendly products	✓	
20% reduced CO2 footprint compared to conventional propellants → Our ambition 80% reduction with DME from renewed resources	✓	✓
Highly qualified technical support on reformulation and lab-tests		✓
