

Dimethyl Ether (DME)

PU Foam

DME is used as a propellant for PU Foam spray cans due to its non-toxic, high solvency and water miscibility and zero GWP potential.

Benefits:

	Economic	Functional
A non toxic and environmental friendly propellant	✓	
High solvency power propellant with significant prolonged shelf life (Winter & Summer)	✓	✓
High purity DME with assured minimal presence of water (typically <50ppm)	✓	
A propellant with a medium Pressure and compatible with all existing propellants		✓
A propellant which is very economical compared to existing blowing agents like HFC134a/HFC152a	✓	✓
