Bio-efficacy against powdery mildew on grapes

Target pest: Powdery mildew (*Erysiphe necator*)
Fungicide: Azoxystrobin 250 g/L SC
Doses: 0.02 % (v/v) Azoxystrobin along with 0.03 % (v/v) adjuvant in 15 L water

In addition to Azoxystrobin 250 g/L SC, trials with Fluopyram + Tebuconazole (200+200) g/L SC, Metrafenone 50 g/L SC, Dimethomorph 50 g/kg WP, Thiophanate-methyl 700 WP have shown that Adsee AMP 40, when used as a tank-mix adjuvant, shows superior control over early and late blight as well as powdery mildew.

When Adsee AMP40 used, nearly 20% increase in harvestable yield can be achieved. No phytotoxicity (no chlorosis, burning, necrosis, epinasty or russetting) is caused by any of the adjuvants tested.

Adsee AMP40 can be readily formulated in-can.

Glyphosate trials

Adsee AMP40 is a sustainable alternative to current adjuvants for Glyphosate.
