

Agrilan 789 Dry

Acrylate copolymer

Agrilan® 789 is a premium modified polyacrylate that can be used as a dispersant. It is solid and white in color which makes it easier to handle in solid formulations that are desired for hydrophobic Ais.

Characteristics

Appearance	Off-white to white colored powder
Density	0.20 – 0.80 g/ml typical untapped at 25°C (Bulk)
Moisture	≤ 5 %
pH	7 - 9 (1% in water)
Solid content	≥ 95 %

Notes:

Typical Data are based on our own measurements or derived from the literature. They do not constitute part of the delivery specification.

Storage

Do not expose open containers to high humidity as that can cause the product to encrust and harden.
