Alcoclear CCP-II

Polycationic

Polycationic water clarifier/deoiler in an aqueous solution. Removes oil, suspended solids, emulsions and other contaminants from produced water in the oilfield. Used in coalescers, precipitators, gun barrels, skimmers, and other oilfield water handling equipment.

Specifications

Appearance	Clear viscous liquid at 25°C
pH	3.5-4.5
Solid content	7.0-8.0 %
Viscosity	≥ 6000 cps (#6 spindle at 25°C)

Notes:
Typical Data are based on our own measurements or derived from the literature. They do not constitute part of the delivery specification.

Applications

Alcoclear® CCP-II water clarifier is designed for oilfield water clarification and produced water treatment. It helps remove dispersed oil, suspended solids, emulsions, and other contaminants to support environmentally responsible water management and disposal. Alcoclear® CCP-II improves phase separation in dispersed gas flotation systems and enhances the performance of coalescers, precipitators, gun barrels, skimmers, and other water-handling equipment. By promoting flocculation and emulsion breaking, it helps increase clarification efficiency in both oil-in-water and water-in-oil treatment processes.

Additional information

Coalesces Oil Particles. Resolves Oil-in-Water Emulsions. Allows Broad Treatment Level. Helps Meet Environmental Without Over Treatment Standards More Easily. Flocculates Suspended Solids. Minimizes Oil Carry-Over in Water Injection Systems.
