

Alcoguard 1340

Alcoguard® 1340 is a unique composition of polycarboxylate and crease resistance agent which imparts a protective, virtually invisible film.

Specifications

pH	5.5 - 6.5
Solid content	29 - 31 %
Viscosity	(RVT #6/20 rpm, 25 Celcius) 5000 - 7000 cps

Notes:

Typical Data are based on our own measurements or derived from the literature. They do not constitute part of the delivery specification.

Safety and handling

All components of Alcoguard® 1340 are TSCA and EINECS compliant.

Additional information

When applied to materials such as cotton, polycotton and polyester crease resistance and soil guard properties are obtained without unwanted build-up or flaking on darker fabrics. Alcoguard® 1340 is completely water soluble therefore is easily removed during the wash cycle providing a secondary benefit of anti-redeposition on hydrophilic soils. Alcoguard® 1340 is supplied in a concentrated liquid form allowing you to optimize the level of dilution required for your application. Recommended use level is 1% -5% solids. The degree of stiffness is dictated by the solids level of the solution applied and the number of applications.
