

# Carbon Disulfide

Carbon disulfide

Carbon Disulfide (CS<sub>2</sub>) is a colorless, dense, highly refractive, volatile, flammable and toxic liquid. CS<sub>2</sub> plays a vital role in many of today's industrial processes.

**CAS number**  
75-15-0

**EINECS/ELINCS No.**  
200-843-6

**Molecular weight**  
76.14

**Molecular formula**  
CS<sub>2</sub>

## Specifications

|                              |                |
|------------------------------|----------------|
| Purity (as CS <sub>2</sub> ) | ≥ 99.9 % w/w   |
| Soluble solid residues       | ≤ 0.0016 % w/w |
| Sulfhydic acidity            | ≤ 0.0001 % w/w |

## Properties Latin America

|                |                                 |
|----------------|---------------------------------|
| Density, 20° C | 1.2614-1.2715 g/cm <sup>3</sup> |
|----------------|---------------------------------|

## Applications

Carbon Disulfide (CS<sub>2</sub>) is an effective solvent for oils, waxes, sulfur and many organic compounds. CS<sub>2</sub> is a main building block in the production of agricultural chemicals including some of the fungicides and soil fumigants that allow farmers to increase yields. It is also used to produce industrial chemicals like xanthates used in mining and rayon used in clothing. CS<sub>2</sub> is also consumed in the production of a variety of pharmaceuticals.

## Storage

Cool and padded with nitrogen or water. Requirements regarding storage tank design are available on request.

## Packaging and transport

Carbon Disulfide is delivered in Rail tank cars, ISO Tank Containers and Road tankers

|                           |                         |
|---------------------------|-------------------------|
| UN number                 | 1131(CARBON DISULPHIDE) |
| Hazard Identification No. | 336                     |

## Safety and handling

Carbon Disulfide is highly flammable and toxic and is classified as a hazardous substance. See our safety data sheet (SDS) for further information.
