

GABROSA M 300

Methyl hydroxyethyl cellulose

GABROSA™ M 300 is a non-ionic, water soluble cellulose ether intended as a water retaining and consistency improving additive to cement based mortars.

Specifications

Appearance	Whitish powder
Particle size	≤ 8.0
Water content	≤ 6.0 %

Characteristics

pH, 1% solution	5-9
Surface activity	Weak

Notes:

GABROSA™ M 300 is a medium viscosity grade of methyl hydroxyethyl cellulose. Sulfate Ash content max 5.0%; Viscosity at 20°C Brookfield RV,20RPM 2 % solution 20,000–30,000 mPa.s

Applications

GABROSA™ M 300 is used in cement-based tile adhesive and grout mortars to improve the workability, consistency, water retention and adhesion.

Storage

In unopened bags, GABROSA™ M 300 can be stored for several years. In opened bags, the moisture content of GABROSA™ M 300 will be influenced by the air humidity.

Packaging and transport

Like many industrial processed powdery materials, cellulose ether dusts are combustible and can cause dust explosions. Dust formation must be avoided or kept a minimum. Care should be taken to prevent ignition from heat, spark, open flames or hot surface. GABROSA™ M 300 is packed in paper bags with polyethylene lining. Net weight 25 kg. We recommend emptying the bags from the bottom. The empty bags can be recycled or burned.

Safety and handling

GABROSA™ M 300 is intended for dry mixing with other powder materials and should not be used for direct dissolving in water. At the temperatures above 250°C (480°F), charring of GABROSA™ M 300 will occur. At high temperatures and in contact with an open flame, GABROSA™ M 300 will burn slowly with the characteristics of cellulose.

Certifications

Nouryon Chemicals AG has been certified according to ISO 9001, ISO 14001 and OHSAS 18001.
