

Sodium Thiocyanate 50%-C

Sodium thiocyanate

Inorganic thiocyanates are used for a broad range of applications but mainly used as raw materials or auxiliaries in fiber production, for agricultural products, in photography and in the chemical industry. The C-Grade has been especially developed to serve to the particular requirements of the construction and Admixture Industry.

CAS number
540-72-7

EINECS/ELINCS No.
208-754-4

Molecular weight
81.07

Molecular formula
NaSCN

Specifications

Appearance	Yellow liquid
Content	49-51 wt%
Density, 20/4°C	1.25-1.35 g/ml
pH, as is	6.0-11.0

Typical characteristics

Heavy metals	≤ 10 mg/kg
--------------	------------

Properties

Miscibility with water	any desired ratio
------------------------	-------------------

Notes:

Analytical methods are available on request.

Applications

In construction industry as a concrete hardening accelerator.

Storage

Store in a cool and dry place and avoid any contact to a strong acid. Use resistant equipment like polymer materials and high grade alloys. Iron corrosion can result in red coloration of product. Although the product is stable when stored under ambient conditions without exposure to other chemicals, it is advised to re-analyze before use after 3 years of storage.

Packaging and transport

Sodium Thiocyanate 50%-C is delivered in: Road tankers, 1000 l Containers.

UN number	none
Hazard Identification No.	none

Safety and handling

For transport, handling and first aid instructions we refer to our Safety Data Sheet (SDS).

All information concerning this product and/or suggestions for handling and use contained herein are offered in good faith and are believed to be reliable.
