

Redicote® E-17

Liquid emulsifier for cationic rapid- and medium-setting bitumen emulsions suitable for chip seal, tack coat and open graded cold mix. Active adhesion promoter for pre-coated chips, cutback or soft bitumen

Benefits and features

- Low use level**
 0.15-0.22% is normally sufficient for rapid-set emulsions
- Medium emulsion viscosity**
 Redicote E-17 produces high residue cationic rapidsetting emulsions with moderate viscosity build, suitable for most bitumen types
- Easy handling and storage**
 Redicote E-17 is a low viscosity liquid, easily soluble in the kerosene used in pre-coated chippings, and easily dissolved during the preparation of emulsion soap phase
- Active adhesion**
 Bitumen treated with Redicote E-17 has the ability to displace water from the surface of aggregates

Storage and handling

Redicote E-17 may be stored in carbon steel tanks. Bulk storage should be maintained at 25-35°C. Avoid extended heating above 65°C. Redicote E-17 contains amines and is corrosive to skin and eyes. Protective goggles and gloves must be worn when handling this product. For further information consult the Safety Data Sheet.

Packaging information

Redicote E-17 is available in bulk shipment, in tight head steel drums of 170 kg net weight or in one-way totes (IBCs) of 800 kg net weight.

Dosage

Cationic rapid set emulsion	0.15-0.22%	pH 2-4.5 hydrochloric acid
Cationic medium set emulsion	0.25-0.50%	pH 1-4.5 hydrochloric acid
Pre-coated chips	0.1 kg/t	basis aggregate
Cutback bitumen	0.5-1.2%	basis binder

Specification

Iodine value, $gl_2/100\text{ g}$	75-95	VV 1.002
Total amine number, mg KOH/g	311-347	VV 1.001
Water, %	max 1	VE 4.003

Physical properties

Appearance at 25°C	liquid
Flash point, °C	170
Pour point, °C	9-20

	20	30	40 °C
Density, g/cc	0.85	0.84	0.84
Viscosity, mPa.s (cP)	23	16	9

Physical properties are typical data based on our own measurements or derived from the literature. They do not constitute part of the delivery specification.
