

## Berol® SurfBoost AD15 surfactant

### The sustainable surfactant booster

A novel, aerobically and anaerobically biodegradable co-surfactant, Berol® SurfBoost AD15 surfactant provides active contribution to sustainable cleaning.

### Boost cleaning performance

Berol® SurfBoost AD15 surfactant is a moderate foaming alkyl amide ethoxylate. Its chemical structure works in synergy with alkyl alkoxyated surfactants boosting degreasing and emulsification performance, even in high dilution, for instance in All Purpose Cleaners (APC) or kitchen cleaners.

### Environmental benefits

Berol® SurfBoost AD15 surfactant is a non-classified co-surfactant which has the primary benefit to be readily biodegradable, both aerobically and anaerobically (following the OECD 301 B and OECD 311 respectively) according to CLP and DPD. It has no hazard classification and is produced with Roundtable on Sustainable Palm Oil (RSPO) certified raw materials, which makes the product suitable for EU Ecolabel and Nordic Ecolabel requirements.

### Household and industrial cleaning

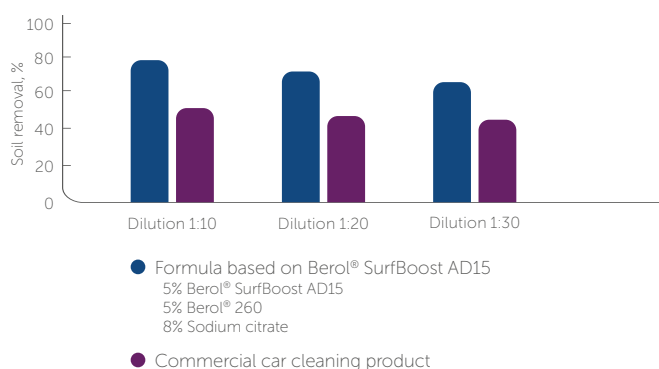

The product has been designed particularly for household cleaning applications where you need to boost cleaning performance without the use of volatile solvents and where you need to meet Eco certifications:

- Manual dishwashing
- Kitchen cleaners
- All purpose cleaners
- Glass cleaners
- Floor cleaners
- Toilet cleaners

Berol® SurfBoost AD15 surfactant can also be used in industrial cleaning applications such as car cleaners and general hard surface cleaning, when more environmentally friendly solutions are needed.

### Comparative degreasing – industrial soil

Berol® SurfBoost AD15 surfactant has a cleaning boosting action on tough industrial soil (used engine diesel soil) at almost neutral pH, even at high dilution.

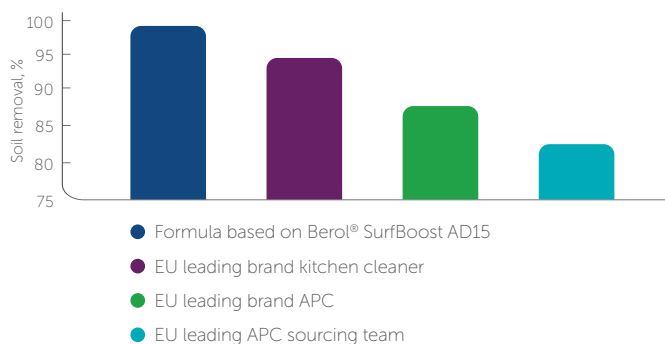

### Comparative degreasing – kitchen soil

Degreasing with kitchen soil on ceramic tiles shows the performance of the different compositions in a non-mechanical cleaning test. The cleaning performance of the formulation boosted by Berol® SurfBoost AD15 surfactant is higher than all the other commercial compositions with parity active matter and pH.

Tiles after cleaning with the test products described in the table and graph.  
Soil: Mixture of kitchen oil and particulate soil

	Composition, %	pH	Active content, %	Soil removal, %
A	2.0 Berol® SurfBoost AD15 2.0 Berol® 260 0.5 Dissolvine® GL-47-S 95.5 Water	>11	3.55	99.6
B	<5% Nonionic	>11	<5	94.4
C	<5% Nonionic and anionic limonene	>11	>5	88.5
D	<5% Nonionic and anionic	~10	>5	83.3

# Nouryon

Nouryon is a global, specialty chemicals leader. Markets and consumers worldwide rely on our essential solutions to manufacture everyday products, such as personal care, cleaning goods, paints and coatings, agriculture and food, pharmaceuticals, and building products. Furthermore, the dedication of approximately 8,300 employees with a shared commitment to our customers, business growth, safety, sustainability and innovation has resulted in a consistently strong financial performance. We operate in over 80 countries around the world with a portfolio of industry-leading brands. Visit our website and follow us @Nouryon and on LinkedIn.
